

Requirements for Software Engineer

Education: Bachelor's degree in Electrical Engineering or a related field.

Experience: Minimum of 3 years

Skills:

- Design and develop electrical systems and components.
- Create and review electrical schematics, diagrams, and technical drawings.
- Conduct feasibility studies and technical assessments for new projects.
- Collaborate with other engineers and departments to integrate electrical systems into overall project designs.
- Perform testing, troubleshooting, and debugging of electrical systems.
- Ensure compliance with national and international standards and regulations.
- Manage project timelines, budgets, and resources effectively.
- Provide technical support and guidance to manufacturing, installation, and operational teams.
- Stay updated with the latest advancements in electrical engineering technologies and methodologies.
- Prepare detailed documentation and reports for internal and external stakeholders.
